PLEASE READ

This is a well-researched topic, feel free to edit to your taste provided you only use it for SIWES training only.

The Content includes logotypes, trademarks and service marks (collectively "Marks") owned by 9jaswitch, and Marks owned by other information providers and third parties. For example, "9jaswitch" is a registered trademark of 9jaswitch. No Marks may be used in any manner unless approved in advance, in writing by 9jaswitch.

Sample of filled SIWES logbook for Computer Engineering

Week NO: 01

Week Ending.....

DAY & DATE	DESCRIPTION OF WORK
Monday	Introduction to the company the department, my role as an intern was discussed
Tuesday	Introduction to the team and staff. Continuation and the Contribution of the Job description as an intern
Wednesday	Worked on rufus, a utility Application
Thursday	Introduction to computer systems Created a bootable drive using rufus
Friday	Completing small task giving by the team members such as researching on a project

For Computer Engineering Students under Networking

Week NO: 02

Category: Networking

Week Ending.....

DAY & DATE	DESCRIPTION OF WORK
Monday	Connecting work stations on the router and pinging the address in the network
Tuesday	Connecting static routers on a group of cisco routers to allow full IP reachability between the various network
Wednesday	Configuring a router filter that will prevent certain excluded subnets to be advertised to the RIP domain
Thursday	Creating a virtual VLAN using a packet tracer simulation and connecting 6 workstations on different networks
Friday	Successfully able to remove the configuration added on a router and was able to route to all destinations, including the networks and subnets of the domain

For Computer Engineering Students under Application and Software GUI

Week NO: 02

Category: Application GUI (UI/UX)

Week Ending.....

DAY & DATE	DESCRIPTION OF WORK
Monday	<ol style="list-style-type: none">1. changing permissions related to OUS (organization unit) within the domain in the Active directory2. Using the Filter option in the Active Directory Users and Computers tool to restrict the display of objects.
Tuesday	<ol style="list-style-type: none">1. Delegating task role to technicians and configuring privilege workflow in the Domain2. Creating and managing group polciy, modifying memberships of a group, as well as resetting passwords on user account

Wednesday	1. Using the Delegation of Control Wizard to assign the necessary permissions on the OU that the new employee is to administer.
Thursday	1. Resetting the computer account in Active Directory. Disjoin the computer from the domain and then rejoin the computer to the domain. 2. Changing the group type to a security group.
Friday	1. Examine the contents of the LostAndFound folder using the Active Directory Users and Computers tool using advanced features item in Domain controller.

Note

This is only a sample page of what activities that occur in the Industrial training field. If you are to use this documents is best to research on:

Networking:

1. Routers and switches
2. Packet tracer

Applications and software:

1. Active directory
2. Domain and domain controller
3. Programing applications
